

## KeyRx™

### Value-Based Design Drug List

Effective January 1, 2021

Your employer has chosen a Value-Based Benefit Design (VBD) for your prescription benefit plan. This means you may have lower out-of-pocket costs for drugs in value drug categories included in your VBD. Value drug categories include drugs that treat certain chronic or long-term conditions.

Below is a list of medications that may be available under your VBD benefit. Please verify with your plan if a generic drug must be tried before filling a brand version of a drug. **Please refer to your benefit materials for coverage details and the plan website for current information as this publication is subject to change.**

*Generic prescription drugs are shown in lower-case boldface type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in all capital letters followed by the generic name. Generic medicines are available for many of the brand-name drugs listed though may not be available in all strengths.*

#### DEPRESSION
